# 2 CLICK AI

⏰ Quick Start Guide ⏰

Welcome to 2 Click AI.

This short and sweet guide will get you setup with the AI in minutes!

🔥 👌 **You made a smart choice - now let's get going, in seconds** 👇

1. Accessing Everything - Members Area

To visit the **2 ClickAI members area,** log in to your WarriorPlus account - and click your **username** in the red + click "**purchase history**":

There you will find all the recent purchases you made on Warrior - including links to all the 2 Click AI members pages.

2. On The Members Area…

You will be able to access all the software tools. If you ever need to create an account for a software tool, be sure to use the email address you purchased with on W+.

3. Getting Updates (To AI + 2 Click AI)

AI is constantly changing (in the last month we have seen GPT v4, MidJourney v5, Canva AI, Runway ML and more!). I do regular updates to the core 2 Click AI tools, free training videos on AI updates, and also webinars with new training and tactics.

To ensure you get access to all this, hit reply to my "welcome email". I will send you a bonus AND it will ensure my email is whitelisted.

4. Getting The Best From 2 Click AI

There are a number of AI tools that I use (well, I use them all!)

But the two in particular I recommend are Chat-GPT and MidJourney. Chat-GPT, PlaygroundAI (images), BlueWillow (images) & ElevenLabs (voice) have **free** plans.

If you are on a budget, here are my recommendations for how to spend your money:

SOMEWHAT LIMITED BUDGETS...
"I have absolutely no money at all" - get Chat-GPT and use Bing Chat also
"I can only afford $20 per month" - get Chat-GPT Plus (UK and US only right now) and get BlueWillow instead of MidJourney (same prompts work)
"I can only afford $30 per month" - get Chat-GPT Plus and MidJourney basic plan

OR... IF YOUR BUDGET ALLOWS...
"I am serious about AI, am cash liquid and can spend if it is advantageous" - if that's you, then firstly get Chat-GPT Plus. Then get Remixable AI (see below). Next, get MidJourney. Next, get Canva Pro (to access the AI inpainting and editing of images). FInally, consider Runway ML for video. Use all these tools and stay subscribed to my list for big updates happening in April!

5. Final Thoughts

Be sure to check out **Remixable**, my marquee software.

Remixable is the all-in-1 software I used to build ALL pages + videos for 2 Click AI! Everything including the software was built with Remixable, Chat-GPT, MidJourney, ElevenLabs, CanvaAI and Dall-E.. Exactly as described in the Remixable training videos!

Basically, Remixable + AI is how I did ALL of the funnel

- Check out [Remixable (now with AI preloaded) here](#)
- Check out the "[How I made $1M webinar here](#)"

OK, keep your eye on your email. More big updates dropping through April 2023 and beyond!

Thanks, Chris
